

eakin Cohesive® seal

Same secure seal, fresh new look

eakin **Cohesive**® seal packaging is being given a fresh new look. From August 2022, you will start to notice the design-only change to our cartons, IFUs and blister lids.

This change has no impact on the seal formula, stability or performance. The materials used in all packaging, primary and secondary, remain exactly the same.

The packaging design change provides a fresh, modern feel that is also more user friendly, providing the following new benefits:

Greater discretion, with a fresh, simple and modern look

Simple, clear information on both cartons and instructions.

Internal seal gauge for small and slims variants - allows you to know how many seals remain in the carton

Easier and quicker to identify with product variant now also printed on lid and sides.

Easy to lift peel tabs on all blisters.

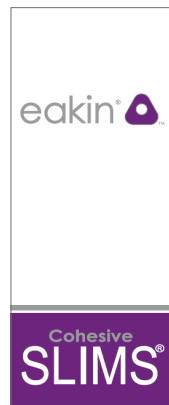

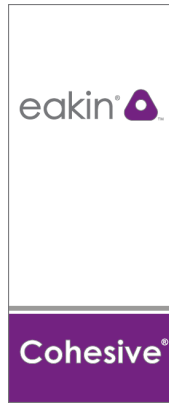

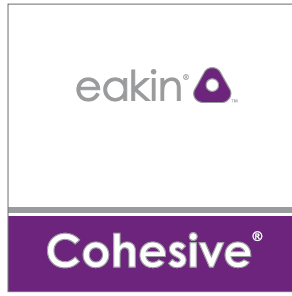

The change affects the following reference numbers, please note that there is no change to these numbers.

Please see overleaf for images and contact details.

	Product Name	Reference	Quantity
eakin Cohesive ® large	eakin Cohesive ® large	839001	10
eakin Cohesive ® small	eakin Cohesive ® small	839002	30
eakin Cohesive ® slims	eakin Cohesive ® slims	839005	30
eakin Cohesive ® stomawrap	eakin Cohesive ® stomawrap	839006	10

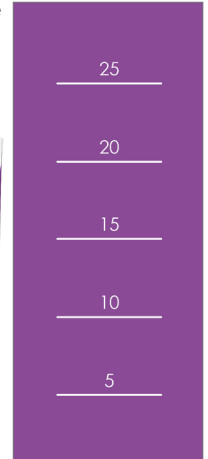

Original cartons

Fresh new look cartons

Example of internal seal gauge

Coming soon: Fresh new look blisters

Initially just the outer packaging and IFU will be updated. Currently we have original blister papers remaining and therefore for environmental reasons we wish to utilise this first. 839001 and 839006 will change first.

Fresh new look IFU
