

Mary* - Feeling comfortable for the first time in 35 years!

After 45 years of having a stoma and 35 years of discomfort, Platinum with Vitamin E has really made a difference to 95-year-old Mary. Despite enjoying a full and active life, Mary always had a feeling of soreness and thought it was all part of having a stoma. She had just put up with the problem which included her skin being dry, crusty and uncomfortable. That was until she was introduced to Platinum with Vitamin E.

Our nurses realised that the product Mary had been using was the source of the problem, and that changing to Platinum with Vitamin E would improve her comfort. Within a week Mary's skin had started to improve and within 4 weeks it had completely healed and no longer experienced any discomfort. After using Platinum with Vitamin E Mary said 'my skin has improved after over 35 years of soreness'.

Week 1

Week 3

Paul* - Less pouches, more comfort!

At 85 years old, Paul found himself bed bound following an ileostomy operation and needed a solution to help get him back on his feet. The solution was Platinum with Vitamin E. 10 months after the operation, he was suffering from extremely sore skin and found it impossible to get his pouches to stick properly. This meant that he had leakage from the pouches causing more soreness and pain every day. Platinum with Vitamin E has made a huge difference to his comfort.

Once Paul started using Platinum with Vitamin E, the leakage stopped completely and his skin was almost healed within one week. Paul was reviewed on a weekly basis and the treatment was a complete success increasing comfort and reducing the number of pouches being used and bought! After trying Platinum with Vitamin E Paul commented on how quickly his skin had healed and how 'it all feels so comfortable now'.

Day 1

After 7 days

Ellie* - Looking ahead to an exciting and comfortable future!

At 30 years old and with a baby on the way, Ellie was experiencing severe discomfort from her stoma, but after discovering Platinum with Vitamin E she was able to get on and enjoy life again. As well as having some shrinkage to her stoma, Ellie also had a history of sensitive skin which meant that she was experiencing a lot of soreness, irritation and bleeding. She found that she also had to change her pouch frequently which made the problem worse.

Our Group nurses helped to find a solution for Ellie which would resolve the problems that she was experiencing and tried Platinum with Vitamin E. Ellie immediately felt that the new pouches were more comfortable and the irritation she had experienced on her skin had disappeared. Within a week her skin had healed and she commented that her pouch changes were much less frequent. A success all round due to Platinum with Vitamin E.
